

ZAINI MUHTAROM

As a recent Informatics Engineering graduate with hands-on experience in full-stack web development, Zaini has designed and optimized scalable systems using Laravel, CodeIgniter, React, and modern front-end technologies. His involvement in real-world technical projects has strengthened his problem-solving, analytical thinking, and ability to deliver efficient, user-focused applications. He is committed to building reliable digital solutions in fast-moving development environments.

EDUCATION BACKGROUND

Pelita Bangsa University | Bekasi, West Java
Bachelor of Informatics Engineering | August 2025

GPA: 3.54/4.00

Relevant Courses: Web-Based Programming, Database Systems, Software Engineering, Information Systems Analysis, Data Structures & Algorithms

PROFESSIONAL EXPERIENCE

PT Dharma Controlcable Indonesia | Cikarang, West Java

Web Developer (Intern) | May 2026 – August 2026

- Developed a dynamic organization chart management system using React.js, JavaScript, and MongoDB, improving structural change processing efficiency by 35%
- Built a multi-level digital approval workflow (prepared by, checked by, approved by) for organizational documents, reducing manual approval time by 50% compared to paper-based processes.
- Designed reusable React components across multiple modules (Organization Chart, Skill Matrix, Job Description Management), reducing new feature development time by 25%.
- Optimized API and database queries in MongoDB, improving page load performance by 40% for large organizational datasets.
- Implemented JWT-based authentication to secure access to organizational data, supporting scalable multi-user access across departments

PT Agung Tirta Lestari | Bekasi, West Java

Web Developer (Intern) | October 2024 – January 2025

- Developed modular Laravel features that improved system scalability and supported a 25% increase in concurrent users.
- Optimized front-end components using HTML, CSS, and JavaScript, resulting in a 40% improvement in user engagement and mobile responsiveness.
- Streamlined system data flow across, client, and server layers, increasing data accuracy by 30% and reducing latency.
- Identified and resolved 20% bug system issues to enhance platform stability.
- Integrated real-time location tracking and facial recognition modules to automate secure attendance processes.

SMK Bina Karya 2 Karawang | Karawang, West Java

PHP Developer (Practical Work) | May 2024 – July 2024

- Designed and developed an online Student Admission System using CodeIgniter 3 with scalable architecture.
- Implemented workflows for registration, verification, admin review, and data synchronization.
- Deployed the system to streamline enrollment for 250 students.
- Performed debugging, optimization, testing, and security checks to ensure smooth performance.
- Prepared technical documentation to support maintenance and expansion.

CERTIFICATION

- Certificate of Online Course (1 week) by RevoU : Intro to Software Engineering
- Certificate of Short Class by MySkill : Website Development : Front-End
- Certificate of Short Class by MySkill : Data Visualization with Microsoft Excel
- Certificate of Course Quiz Practical by Sololearn : Practical Understanding of Java

PROJECT EXPERIENCE

Web-Based Employee Organization Structure PT Dharma Controlcable Indonesia | Cikarang, West Java

May 2026 – August 2026

- Developed an interactive organization chart editor with drag-and-drop, resize, and multi-level approval features for HR structural changes.
- Built an organization structure management system with digital signature validation to replace manual, paper-based approval processes.
- Used React.js, JavaScript, and MongoDB to support scalable, multi-department access.

Web-Based Employee Attendance System PT Agung Tirta Lestari | Bekasi, West Java

October 2024 – January 2025

- Developed a secure attendance system integrating facial recognition to automate clock-in/out validation.
- Used framework Laravel, and data flow between frontend to improve verification accuracy.

Employee Performance Appraisal System (AHP Method) PT Agung Tirta Lestari

October 2024 – January 2025

- Built a decision-support system implementing AHP to evaluate employees with structured scoring criteria.
- Designed workflow modules enabling consistent performance assessments.

Web-Based New Student Admission System SMK Bina Karya 2 | Karawang, West Java

May 2024 – July 2024

- Created an online platform allowing students to register, submit documents, and select majors without visiting the school.
- Enhanced admin-side workflow efficiency for 250 students.

SKILLS & LANGUAGES

Skills: Web Development (JavaScript, PHP, Typescript, React.js, Vue.js), Framework (Laravel, CodeIgniter), MySQL, MongoDB, REST API, WordPress, Git, Figma, Microsoft Office (Word, Excel, Powerpoint, etc..)

Languages: Indonesian (Native), English (Intermediate)
